

IS WISCONSIN REALLY SAFE FOR SENIORS?

Not with Scott Walker in the driver's seat...

While Gov. Scott Walker and his GOP legislature have enacted bills that will clearly hurt most Wisconsin families, they've made senior citizens especially vulnerable. With budget cuts, tax increases, and corporation-coddling lawmaking, seniors have lost a great deal of security—not just financial, but physical too. Walker and the GOP have hit our seniors hard, hit them where it really hurts, even hit them where they live.

BadgerCare: For seniors who need to rely on BadgerCare because they haven't become eligible for Medicare, Walker's \$466 million cut in BadgerCare funding could be devastating. Furthermore, the new budget bill gives the administration broader power to manipulate the program than ever before and with little legislative oversight. Formerly health care they could count on, BadgerCare has become serious "social insecurity."

Increased Taxes: By eliminating both the Earned Income Credit and Homestead Tax Credits, Walker's budget effectively increases the tax burden on Wisconsinites, taking nearly \$70 million over two years from seniors and the working poor. For seniors whose retire-

Increased Taxes: By eliminating both the Earned Income Credit and Homestead Tax Credits, Walker's budget effectively increases the tax burden on Wisconsinites, taking nearly \$70 million over two years from seniors and the working poor. For seniors whose retire-

ment plans were hit by the recent recession, those already living on a fixed income, and others still working just to make ends meet, this tax increase is especially cruel.

Nursing Home "Reforms" : While many, maybe most, nursing homes are responsible, many, way too many, are not. But Gov. Scott Walker, showing his compassion for the corporate world once more, has put policies in place that put nursing home residents, most of whom are elderly, at the mercy of the homes themselves. How? By:

- **Allowing nursing homes to hide reports about elder neglect and abuse from public view.**
- **Prohibiting state investigations of elder neglect and abuse in nursing homes from being used in civil and criminal cases.**
- **Imposing a limit of \$750,000 for pain, suffering, disability, grief, loss of dignity, or shortened life on an abuse or neglect claim filed against a nursing home.**

Our older friends and family members deserve dignity, respect, care, and concern—and freedom from unnecessary worries beyond those that come naturally with advancing age. They deserve to feel safe. Scott Walker has denied them that. It's time for him to go.
